

Harvard Global Health Catalyst Summit, 28-30 April, 2017 @ Harvard Medical School, Boston, MA, USA.

=====

To the kind care of dear speakers and partners in Harvard GHC Win-Win session on 28 April and the 2 side Win-Win Working meetings on 29 April, 2017:

<https://www.globalhealthcatalystsummit.org/win-win>

First of all The Win-Win initiative is a notion. It is a hand in hand cooperation. It belongs to all of you.

As you know, when President J.F. Kennedy declared that the arrival of the first human being to the moon will be before the end of the Sixties , it was seen very difficult and far objective, full of obstacles and challenges. It was not just the money or the work that made it happened.. But it was the focused scientific and practical work concentrated on arriving to the endpoint.

In our session of Harvard Global Health Catalyst Summit, 28 April, 2019, in Harvard GHC Summit @Harvard Medical School, we are NOT going to repeat long introductions, or data about the tragic situations or detailed information about the increased gap between the required and the available clinical oncology-radiotherapy cancer care , and prevention. The tragic situation is Known by all!. Also, we'll not spend time to repeat decelerations and call for actions. There is enough!. Millions of cancer patients and their families in the world are in need to actual, touchable, accessible and affordable cancer services and not just talks or publications or conferences.

As it is impossible to say all in a few minutes presentation, then we'll be so focused in our talks in the session, Moreover , in the side 2 meetings of 29 April, 2017 -as you see below- your contribution is mandatory to make more practical progress.

Thank you all.

Going forward, hand in hand. Sincerely, Ahmed Elzawawy

worldcooperation@gmail.com

=====

Friday 28 April, 2017. 4.00 pm-6.15.00 pm

Catalyzing win-win partnerships to increase Radiotherapy-clinical oncology cancer care and prevention in LMICs starting from Africa.
